Lab 5 Resource Document: Exam Preparation

Exam 1 will be on Friday, February 28th.
The best way to study for the exam:

- **Lab Problems** on paper! (We've let you keep the questions for a reason)

- Do **ICAs** on paper (don't look at the solution until after!)

- Do **short problems** on paper

- Go to the **Review Session** on February 26th at 6:00pm, do the **Review Guide**

  - Location will be announced on Discord

- Look over the slides

Hand writing solutions is different from coding them in your IDE, and it can be harder. The exam is hand-written, so it's good to practice hand-writing your code.

On the date of the exam, make sure to bring your ID.
